FULL STACK SOFTWARE ENGINEER

Meticulous and results-oriented developer experienced in Ruby, JavaScript and Java based programming who takes on new challenges with determination and excitement. Consistently meets last minute deadlines by utilizing time management skills while working with a sense of urgency. Effective, collaborative and adaptive professional who thrives in environments that challenge the mind to solve technical problems. Looking to leverage evolving tech skills to grow in a role that encourages learning and creativity.

TECHNICAL SKILLS

- React / JavaScript
- Node.js / Express.js
- CI/CD Pipelines
- TypeScript
- TypeORM
- Ruby / Rails
- Java
- PostgreSQL / SQLite
- HTML / CSS
- Redux / Redux Saga
- Git

SOLO TECHNICAL PROJECTS

MyStyle - [Github](#) | [Demo](#)

Never waste time trying on outfits. With MyStyle, a user can manage their closet and try on outfits digitally.
- Programmed with Rails 5 API server for ease, PostgreSQL for durability and React.js frontend
- Utilized Bootstrap, Material-UI and Semantic-UI for component styling and custom CSS for closet and clothing fit

DJ Booker - [Github](#) | [Demo](#)

With Booker, all available DJs are in one spot, available for hire at the click of a button.
- Developed with Rails 5 API backend, PostgreSQL and React.js frontend for a more synchronized user experience
- Designed using Semantic-UI for multiple components, forms and buttons and custom CSS for spacing

PROFESSIONAL EXPERIENCE

Software Engineer II

GIANT MACHINES | New York, NY | September 2021 - Present
- Designed and developed a new web portal for users to do administrative tasks, including, creating and updating users, as well as, removing work orders in bulk in order to mitigate them from manipulating the database directly
- Built and deployed a new microservice Azure repository using Node/Express and created a Jenkins Docker CI/CD pipeline
- Contribute during client-facing presentations and meetings by showcasing project work
- Collaborate with multiple teams including design, product and qa for project planning

International Flight Attendant

AMERICAN AIRLINES | New York, NY | September 2014 - September 2022

Utilized SABRE operating system to construct monthly work schedules and research flight information
- Elevate customer experience using prior fine dining training, serving 200+ individuals both independently and in a team without supervision, resulting in multiple 'Above and Beyond' certificates of recognition
- Provided leadership and reasoning as Purser for 13+ crew members on international flights
- Ensured the safety, security and comfort of all customers by utilizing crew resource management to respond to a variety of emergency and non-emergency situations
